Thought I'd print this and bring to the AG meeting as a follow up from the PFAS mtg.

**Subject:** WE MUST HAVE YOUR ATTENTION.

Dear Louis,

I have lost track of the number of attempts I've made to gain AG Maura Healey's attention. I am calling on you to advise her this is a ILDH issue.

Immediately Dangerous to Life and Health.

Although you are in the environmental protection division of the AG's office in Massachusetts, and your efforts have been to see what options your office has in acting on this issue, I have not heard or spoken to you since February I believe.

We need the AG's immediate attention. Someone from her staff is reading ALL of my private messages on social media. AG Healey has been chosen by PFFM as their choice for AG. I have been extremely critical of her efforts for this issue. Which have been ZERO.

**I must have word reach her.** We have received confidential information regarding the upcoming lobbying efforts of a national coalition regarding PFAS use by the fire service that must be known to someone in authority. Should I receive no reply from your office by Monday, July 9 at 5pm I will forward my information to US Attorney General Underwood of New York.

This information will put our first responders in even greater harm due to the non-existent regulations of the chemicals the fire service will use to combat fires.

I will be posting all correspondence from your office. I will also be posting this message on my Facebook page Your Turnout Gear and PFOA, until such time as we hear directly from Maura Healey.

This must not wait one more day. We must discuss the poisoning of the fire service by the manufacturers of our gear, and our AFFF. She either wants to do something or not. We need to know which.

Who is protecting the protectors??????

Sincerely,  
Diane Cotter
